*P3a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The Orval-Kent Food Company building is designed in the California mission style. The structure is flat-roofed. Atop the façade is a molded parapet with molded coping, two small spires adorn the ends and rest upon the narrow cornice work. Spanish style tile coping also runs the along the roof course throughout the rest of the building. Second story windows are recessed with nine-pane swing-out windows. A quatrefoil window with stained glass is centered in the upper section of the façade. The entryway and lower story windows are framed by Romanesque arches. Two pilasters are positioned on either side of the wood and glass doors. The exterior is entirely of textured stucco and is in good to excellent condition.

The setting is a mix of industrial and commercial. The building is located on the southwest corner of the intersection of S. Soto Street and E. 50th Street. The structure is surrounded by other light industrial buildings and railroad spurs. The City of Vernon Power and Light Plant switchyard is located immediately north of this building across E. 50th Street; the Station A building is northwest, adjacent to the switchyard.
